

Home

midPoint

This is Wiki home of [midPoint](#) - identity management and governance system. The best way to start is an [Introduction](#) page.

Wiki Contents

- [Introduction](#) provides basic description of midPoint product, features and project approach, including [project history](#) and [plans](#).
- [Architecture and Design](#) is a rich section describing midPoint architecture, principles, subsystems, data structures, etc. It is a must-read for anyone seriously interested in midPoint.
- [Documentation](#) provides a collection of pages related to midPoint installation, customization and use.
- [Developer Zone](#) provides information about midPoint development, coding guidelines, code structure, etc.
- [Feedback](#) page describes various ways how to provide feedback to the midPoint team.

Quick Start

If you are new to midPoint, there are several "tracks" to start exploring it:

- [MidPoint Book](#) is an excellent starting point for any midPoint-related activity.
- [Trying MidPoint](#) provides short instructions to have midPoint up and running in minutes.
- [Enterprise Identity Management](#) provides short introduction to IDM field.
- [Architecture and Design](#) will provide theoretical overview of what midPoint is and how it works.
- [First Steps](#) provides a guidance how to quickly install midPoint and configure it.

Community and Ecosystem

See [Participation](#) page for all the details about midPoint community and ecosystem. Quick links:

- [Mailing Lists](#)
- [Development Participation](#) and [Code Contribution Guidelines](#)
- [MidPoint-Related Projects](#)

Thanks

The midPoint development team members would like to express our greatest thanks to:

[Atlassian](#) for providing great tools to support software development. The development without [Jira](#), [Confluence](#) and [other tools](#) will be much more difficult.

[JetBrains](#) for providing [IntelliJ IDEA](#) - an IDE that impressed most of our development team members. IDEA makes our team much more productive.

ZeroTurnaround for providing **JRebel** - an JVM-plugin that makes it possible for our developers to instantly see any code change made to web application *without* redeploying.

YourKit is kindly supporting open source projects with its full-featured Java Profiler. YourKit, LLC is the creator of innovative and intelligent tools for profiling Java and .NET applications. Take a look at YourKit's leading software products: [YourKit Java Profiler](#) and [YourKit .NET Profiler](#).

News
